

ECO Bird Feeder

recycle....re-use

Please note it is dangerous to feed wild garden birds the following foods:

Salty food, which can dehydrate them.

Vegetable, chicken or turkey fat, which can stick to their feathers, preventing them from being able to preen or fly.

Milk, which can cause severe stomach upsets (though a small amount of cheese is fine).

Desiccated coconut, which can swell there stomachs and cause problems.

Mouldy food, which can cause respiratory problems.

Stale food, which can encourage the Salmonella Virus.
